

The actions of Sinclair Broadcasting are appalling. Their abuse of the television waves to run propaganda against John Kerry is a danger to our democracy. They have a responsibility to show their viewers all sides of the issue. This does not include forcing their affiliates to preempt normal programming to run a documentary that is nothing more than a Republican campaign ad.

This is proof that ownership rules need to be strengthened. The people want the truth not the image of "truth" that puts more money in the pockets of these giant media corporations. Thank you.
